Strong experience in development pipelines and tooling, and deployments. I have 6+ years Linux server admin experience managing and providing support, security, configuration and management on a wide range of Linux web servers as well as experience running AWS, digital ocean, Azure and Google AppEngine systems.

Specialties: Web Development, Nodejs, Cloud infrastructure, AI/ML models, data mining, computer security, Indie game development, multiplayer game/web app servers, Golang, Flutter/Dart, Flash, PHP, Perl, Actionscript, Javascript, Typescript, Unreal Engine, Unity/C#, XNA, DirectX/OpenGL, e-commerce, API integration, Linux server administration

Experience

Earnest

Senior Software Engineer

June 2021 - January 2024 (2 years 8 months)

Worked with the Growth team and many different stakeholders and lead multiple projects to improve our customer experience and top of the funnel conversion. Collaborated to architect from planning to working product multiple new tech stacks, including Lambdas, AWS gateways, user referral tracking, transitioning from Wordpress for content editors, NextJS with static site and incremental site generators, updates to Jenkins and Git workflows, and more.

Worked directly with product, marketing, lifecycle, partner, analytics and more teams to get project requirements and plan out the work, while onboarding other developers onto these projects

Wizeline

Senior Software Engineer

December 2019 - June 2021 (1 year 7 months)

Guadalajara Area, Mexico

Worked as a contractor on the platform backend of a U.S finances company using a stack with NodeJS, AWS, Docker, Jenkins, Postgresql and GraphQL

ryanguthrie.com

Consultant/Programmer

March 2008 - April 2021 (13 years 2 months)

Custom software development, Linux system administration and software modifications on a freelance/contrast basis.

Contracts include:

server setup & scripting,

PHP/Perl/Python/node.js web apps,

Flex / ActionScript mobile and web

extensive Javascript work - frontend, visualizations, nodeJS, TypeScript, React + More.

Drupal modules and customization.

Flutter mobile and web apps and games.

Game dev with Unity or HTML5 (phaser,three.js,webgl).

Database setup or migrations (mysql,oracle, postgres, Azure, mongodb).

AWS scaling on demand backend APIs and services

Wordpress plugins, themes, full setup, and upgrades

Paybook

Senior Software Architect

January 2013 - December 2019 (7 years)

Designed and built solo, the first horizontal scaling backend to aggregate a wide variety of financial data for banks and services in Mexico, LatAm, US, Crypto and more. Integrations for Mexico tax services and expense correlation, visualizations, utility bills. Like Plaid before there was Plaid. Included fault redundancy, tooling, server configuration, and developer onboarding.

Javascript frontend (D3, Angular, multilingual platform)

PHP, MongoDB

API and data aggregation for financial accounts framework

Flutter mobile with Tesseract for on device OCR and Tensorflow backend

New World Brands, INC

Programmer

April 2008 - March 2009 (1 year)

Eugene, OR

Developed internal applications utilizing a mix of Perl with Javascript/AJAX based user interfaces to manage and automate international VoIP networks

Saved the company money by creating automated smart recharging and routing to a dynamic set of routes

Built dashboards and monitors to control traffic and find possible errors before it was user impacting

TouchSupport

Linux System Admin

October 2005 - March 2008 (2 years 6 months)

Top level outsourced support/admin for various webhosting companies

Ran security audits, setup and upgrades for linux servers

Responded to server security issues and fixing performance concerns

Troubleshooting for CPanel & Plesk dashboard support issues

Provided additional support for domain name registration
